We Build Together

GLOBAL LEADER ONE-STOP ENERGY SAVING BUILDING SYSTEMS

PU WALL PANEL

The Polyurethane wall panel is generally divided into three types: Small seamless corrugated wall panels, The slotted corrugated wall panels, The concave wall panels and Mirror panels.

PU ROOF PANEL

The polyurethane roof panel is divided into two types: The three waves of polyurethane composite roof panel, The four waves of polyurethane composite roof panel.

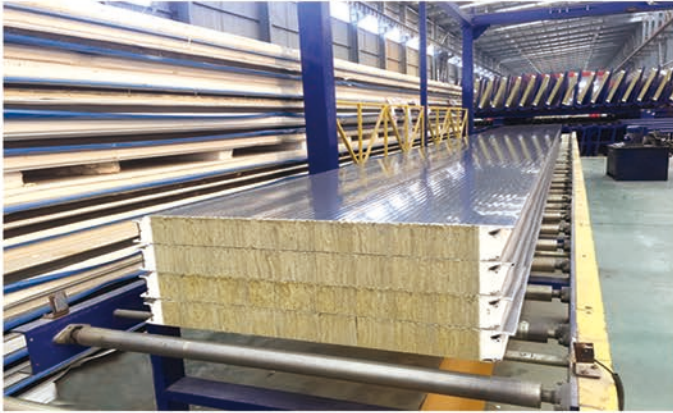

COLD ROOM PANEL

Cold storage compared with conventional thermal insulation, resistance to deformation, not easy to crack, wall appearance and other characteristics, shorten the construction period, and has a longer service life.

APPLICATION

It can be used in large industrial plants, warehouses supermarkets, hospitals, stadiums, cold storage, activities room, office building, pharmaceutical factory, clean workshop and heat insulation place.

ROCK WOOL PANEL

It is widely used to many fireproof building which have a high fireproof requirement. Such as, suburban housing, villa, kindergarten, commercial building, workshop, airport, cold storage, etc.

GARAGE DOOR

All the key components of BRD Group Garage door and Industrial Door are developed and manufactured by the company, guaranteeing the perfect match between the door body, the motor and the control and the system.

Not only that, BRD implement the ISO9001 quality management system, research and development, procurement, production, logistics and other links are strictly controlled by the system, to ensure that the quality of products and services.

INDUSTRIAL DOOR

STEEL TRUSS DECK

The steel bar truss deck is a new metal deck design and it is widely applied for the mezzanine construction of commercial and civilian buildings, such as factories, hospitals, gymnasiums, schools, bridge projects and residential buildings.

STEEL BUILDING SOLUTIONS

Steel structure processing is a new breakthrough in the field of modern architecture in 21st century. It is an pr-engineered steel structure which is widely used for the large-scale workshop, or used for the warehouse, supermarkets, entertainment centers, gymnasium and other light steel villa buildings.

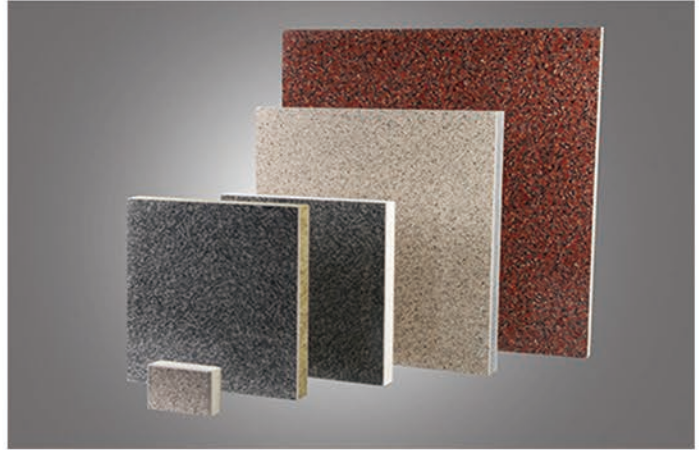

WALL CLADDING SYSTEM

External wall cladding insulation system panel or board is a general class of non-load bearing building cladding systems that provides exterior walls with an insulated, water-resistant, finished surface in an integrated composite material system.

BENEFITS

1. Various decoration
2. Multiple safety
3. Self-cleaning
4. Long service life
5. High cost performance
6. Excellent heat insulation
7. Easy installation

APPLICATION

It is widely applied for villas, municipal projects, large residential estate and other large-scale office buildings.
